HOLOLIGHT

HOLOLIGHT HUB

RELEASE NOTES

Version 2024.0.0.0

Table of Contents

Hololight Hub

Updates

Users

- Sign in with your email address and password.

- Add users to your tenancy using the "Add user" page. When adding a user, an administrator can specify the user's first name, last name, email address, access role, and password.

- See the number of remaining minutes of active session time.

Applications

- Upload applications built with Hololight Stream 2023.1.0. To connect to sessions with applications using this version of Hololight Stream, you need to download the Hololight Hub Client version 2024.0.0.

- When uploading an application, you can choose an icon and banner as well as specify meta-data for your application. Metadata will be shown on the applications information page.

- Users within a tenancy can use any of the tenancy's applications.

- When running an application, sessions display the status "Available" when it is possible to connect to them with Hololight Hub Client.

Virtualization

- Support for running applications using Amazon Web Services EC2 instances.

- Start, stop, and reset application sessions across five different regions:

  - Tokyo, Japan

  - Northern Virginia, USA

  - Dublin, Ireland

  - Northern California, USA

  - Frankfurt, Germany

UI and UX

- "Getting started" page shows instructions on how to use the webpage and client.

- Dedicated pages give access to user and application management.

Clients

- Download and use Hololight Hub Client on the following devices:

  - Magic Leap 2

  - Meta Quest 2

  - Meta Quest 3

  - Meta Quest Pro

  - Microsoft HoloLens 2

- Added signing in with your email address and password.

- Added "Remember me" when signing in to allow subsequent sign ins with a six digit pin.

- Can now view the applications in your tenancy.

- Can connect to applications in the "Available" state.

Known issues and limitations

- Applications built with DirectX 12 crash on Hololight Hub.

- Uploading applications as a folder fails during the upload process. You should instead upload applications as a ZIP file only.

- Users are restricted to running sessions for a set number of minutes. You can add more minutes by contacting Hololight.
